

Transparency

ISO 9001:2008 CERTIFIED

As an accreditation organization, NAAMTA found the strategy of pursuing ISO 9001:2008 certification very appealing for the structure, transparency, and continuity it demonstrates to the companies we audit. It not only made NAAMTA accountable for its processes, but also benefits our members.

NAAMTA began implementing ISO 9001:2008 Quality Management System (QMS) techniques in 2010, an effort that required defining and documenting all processes for both internal and external procedures. This entailed identifying all of the tasks associated with each process and demonstrating an adherence to the outlined activities through annual reporting and regular management review meetings. By achieving certification as a QMS, NAAMTA was able to increase its auditing efficiency and quality.

In March of 2012, NAAMTA achieved full ISO 9001:2008 certification as a QMS. While a small organization, NAAMTA succeeded in three years what took other organizations an average of five years to complete. Gaining ISO 9001 certification helps set NAAMTA apart from other accreditation organizations as one that can prove true program transparency, and guarantees a dedication to its own expected standards of performance.

Benefits

Quality Standards

Since NAAMTA's inception in 2009, we have made great strides in identifying key best practices to improve the standard of performance among EMS providers at national and global levels.

Web Tools

NAAMTA Alliance members have access to a variety of web resources, from an online learning center to a variety of transport reporting tools. NAAMTA accreditation isn't just about getting our seal of approval. We want to help you better the medical transport industry.

Auditing Assistance

We understand the intricacies of applying for accreditation and maintaining your status. As a service-based organization, we work with you and provide tools to help your organization succeed in compliance.

Testimonials

"Whether we're looking at medical practices or financial management, whether we're examining aircraft maintenance or continuing education, NAAMTA guides us to the highest and best reference against which we and our clients, patients, and medical personnel and flight crews can measure performance."

Stuart Hayman, CEO
REVA

"Hawaii Life Flight's accreditation with NAAMTA gives distinction to our air medical program as it creates standards for us to be measured by and be accountable for. Working with NAAMTA to achieve their accreditation has really brought these principles to the forefront."

Dawn Guillermo, Program Director
Hawaii Life Flight

"Classic Lifeguard appreciates NAAMTA's recognition of our commitment to excellence in the areas of ethical practices, safety and continuous quality improvement. We look forward to many years of working with NAAMTA in improving overall patient care and aviation safety."

Matt Stein, Program Director
Classic Lifeguard

About Us

NAAMTA is the new accreditation standard bearer for the medical transport industry, offering procedures that include guidelines for developing a quality management system focusing on transport safety, patient care, and continuous improvement.

Since its inception in 2009, we have made great strides in identifying key best practices to improve the standard of performance among EMS providers at a national and global level.

NAAMTA at a Glance

- ✓ Recognized form of EMS accreditation by the United States Department of Defense.
