

Your NAAMTA Web Portal

All NAAMTA Alliance Members are given their own web portal through our website. These portals provide a resource for you to store accreditation documentation and company reporting like flight tracking.

But why should you trust your data with NAAMTA?

Owned & Operated

The web portals offered to each Alliance Member are hosted on servers owned and operated by NAAMTA. You don't need to maintain your own server hardware or worry about service updates.

Redundancies

All data and files uploaded to your NAAMTA member portal is backed up daily to multiple secure locations, ensuring the ongoing safety and accessibility of your information.

Secure Connections

The data located on your web portal is highly secure, using 128-bit secure socket layer (SSL) encryption. Any data you send or receive via the portal is protected against interception and theft.

Company Privacy

Each user is only given access to their company's web portal. Any information you store with us will not be visible or accessible by anyone outside your organization.
